

Fungal growth networks

network size	224
1-shell size	12
max periph. hub degree	1
avg non-leaf degree	1.0
max coreness	2
avg 2-core coreness	2.0
max tree depth	1
avg tree depth	0.5

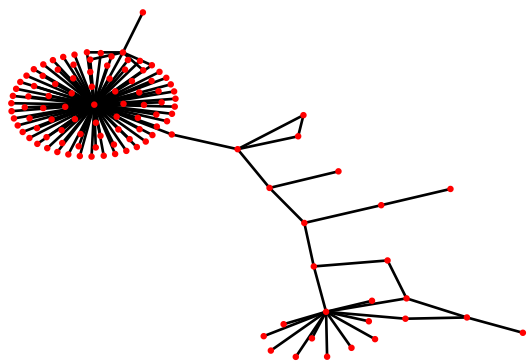

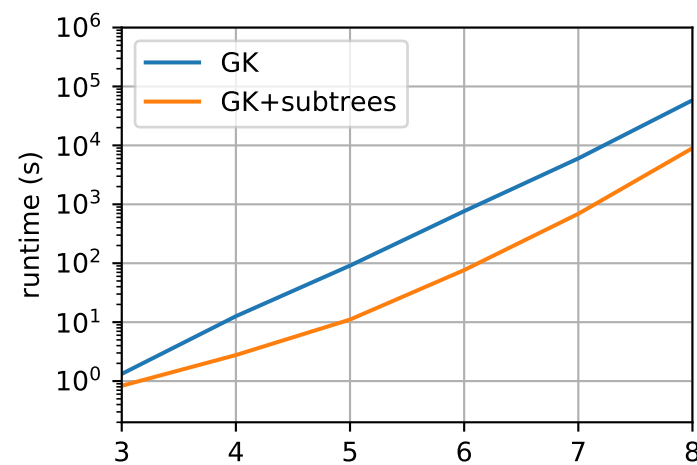

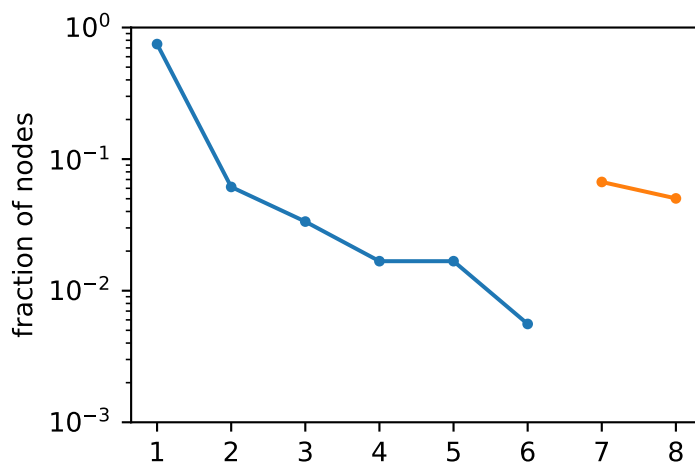

Political books network (2004)

network size	105
1-shell size	0
max periph. hub degree	0
avg non-leaf degree	0
max coreness	6
avg 2-core coreness	4.91
max tree depth	0
avg tree depth	0

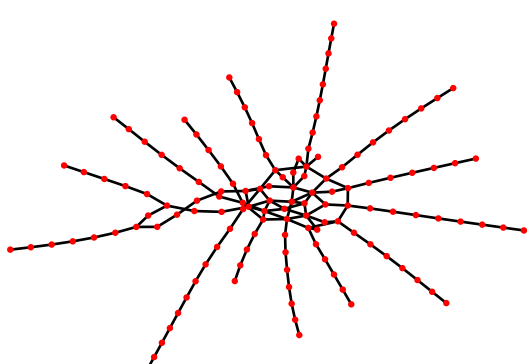

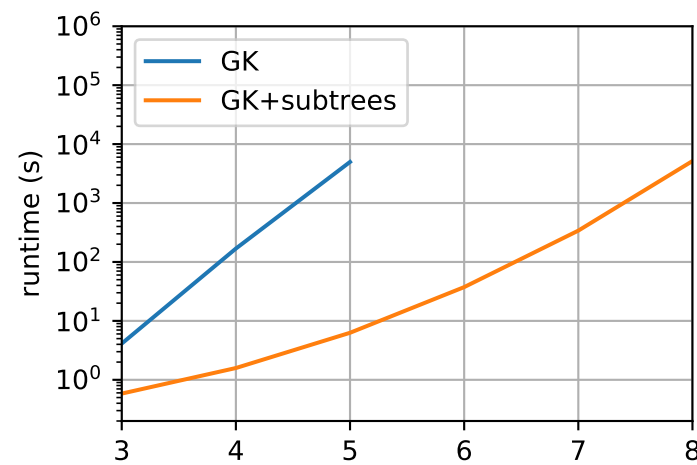

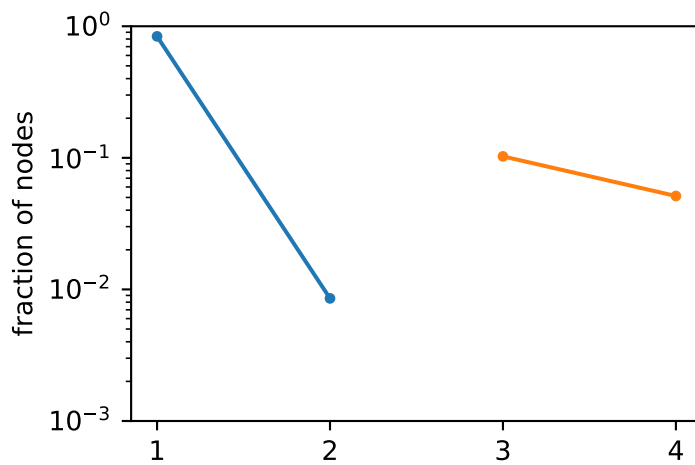

Norwegian Boards of Directors (2002-2011, bipartite)

network size	179
1-shell size	158
max periph. hub degree	23
avg non-leaf degree	4.55
max coreness	2
avg 2-core coreness	2.0
max tree depth	6
avg tree depth	0.21

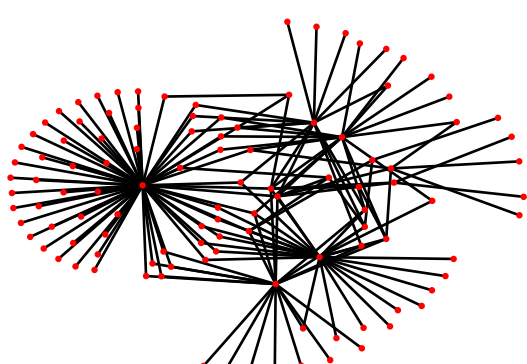

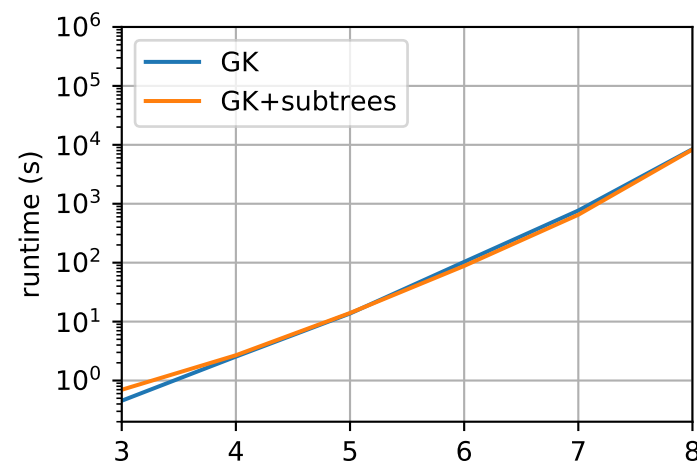

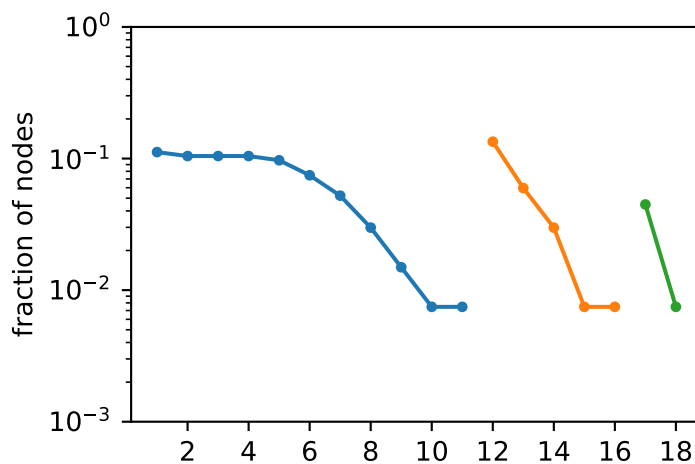

C. elegans interactomes (2009)

network size	117
1-shell size	99
max periph. hub degree	84
avg non-leaf degree	14.14
max coreness	2
avg 2-core coreness	2.0
max tree depth	2
avg tree depth	0.07

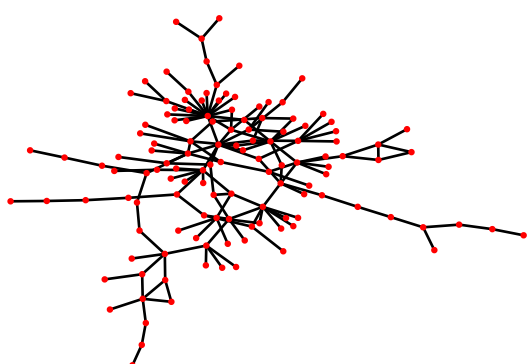

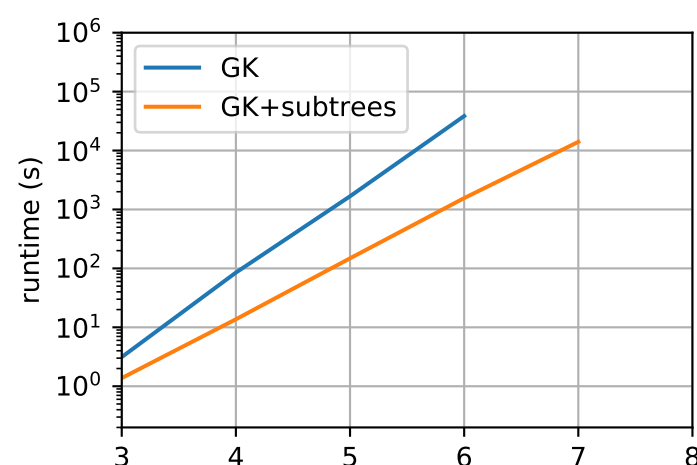

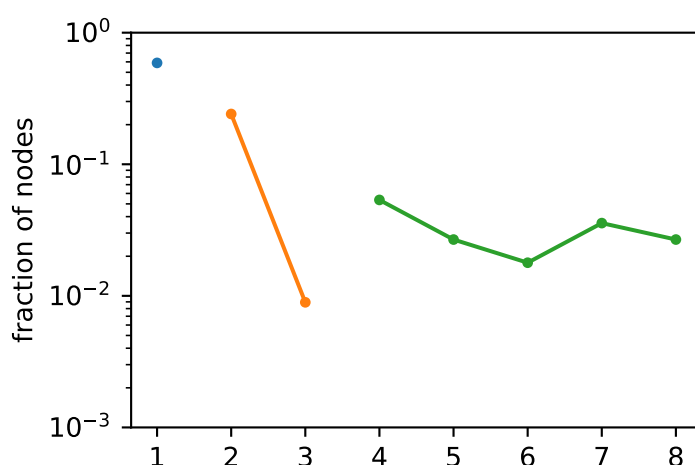

World subways (2009)

network size	134
1-shell size	95
max periph. hub degree	2
avg non-leaf degree	1.73
max coreness	3
avg 2-core coreness	2.18
max tree depth	11
avg tree depth	0.82

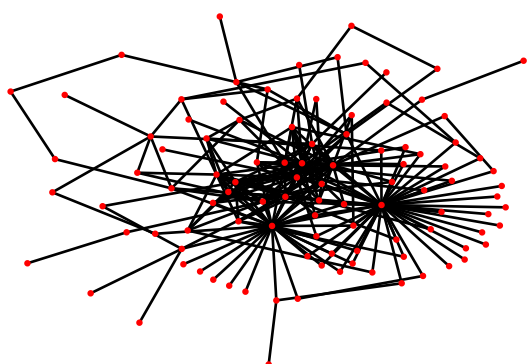

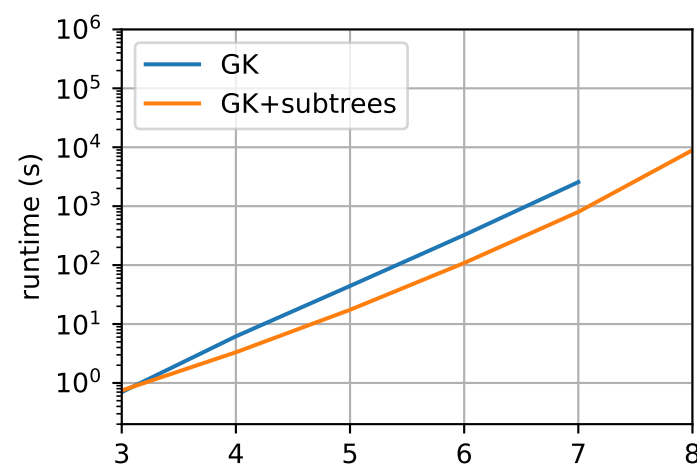

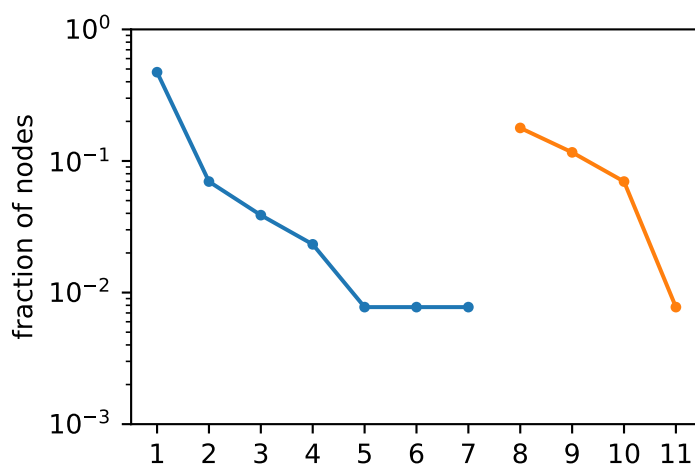

Barrett & Helenurm plant-pollinator web

network size	112
1-shell size	66
max periph. hub degree	38
avg non-leaf degree	8.25
max coreness	3
avg 2-core coreness	2.39
max tree depth	1
avg tree depth	0.11

Binary interactomes (various species; 2012)

network size	129
1-shell size	81
max periph. hub degree	14
avg non-leaf degree	2.14
max coreness	2
avg 2-core coreness	2.0
max tree depth	7
avg tree depth	0.39

Route Views AS graphs (1999-2000)

network size	103
1-shell size	29
max periph. hub degree	10
avg non-leaf degree	2.23
max coreness	7
avg 2-core coreness	3.45
max tree depth	2
avg tree depth	0.33
